today's **top tech stories** | curated by **hackernoon.com**

Francis Lacoste has worked from home for 20 years, having started his management career in 2007 as part of a remote-first culture at Canonical. He joined Heroku and Salesforce over 7 years ago to help support and expand remote culture, and you can **GO HERE NOW to Ask Lacoste Anything.**

Lacoste will be answering your questions live on March 4th at 12 PST/3pm EST. Get in, add value!

the **best tech stories** published on **hackernoon.com** in the last 24 hours

How To Develop A New Product Development Strategy: From Idea to Commercialization

By Vadim

When it comes to successful new product development, productivity is key. Entrepreneurs seeking to remain relevant, efficacious and profitable must continuously conceive and develop new products that not only make it to the market, but also deliver great value to target audience members.

How Swarm Intelligence-Powered Vehicles and Smart Cities can Help Streamline Traffic

By Himanshu Ragtah

Given the advent of autonomous cars and their growing penetration in the transportation market, it is empirical that companies consider using Swarm Intelligence to tackle traffic and make the daily commute a lot more pleasant for billions around the world.

Bitcoin Retirement Series Part I: How To Invest In Retirement Plans (US Version)

By Han

First things first, I refer to Bitcoin index funds as something that tracks Bitcoin's price performance. While many index funds in stock market track a basket of underlying assets, most Bitcoin index funds track only Bitcoin. Bitcoin index funds are probably the easiest for beginners to start with.
